

 **Home Page Plus** for ACT! by Sage

Add IE into **ACT!** - Navigate to the contacts home page.

- Adds Internet Explorer **inside of ACT!**
- Add or remove toolbars to **increase viewing space.**
- **Favorites** put web sites you visit often within easy reach.
- HPP uses your **Internet Explorer** settings.

[Click for more information](#)

Home Page Plus creates a new tab in the Contact Details view that automatically navigates to the contacts web site. If the contact does not have a web site then it navigates to the email web site. Example: The contact has no web site but does have an email address of Sales@DurkinComputing.com then Home Page Plus will navigate to Http://www.DurkinComputing.com based on the email address.

Home Page Plus is for any user you needs to quickly view the contact's web site. **Home Page Plus** creates a new TAB in the Contact Details view that navigates to the contacts Web Site.

I am excited about using this and I will most heartily refer people to you - because your focus, obviously, is on customer service!
